Thank you for registering with Triggerfinger Software.

Your interest in our products is appreciated.

Comments concerning the product's usefulness and recommended enhancements can be posted in the forum section of our website, www.triggerfinger.biz.

Getting Started

1. Download the software from www.triggerfinger.biz

2. Attach your USB enabled game controller to the USB port

3. Double click the Triggerfinger Software icon to open the program

4. Print the Key Guide for easy reference

1. Open any program

2. Use the Key Guide and start your text input

3. Right click on the tool bar icon to:

   - Adjust the calibration of the keys
   - View device information
   - Exit the program

Helpful Hints

- POV button controls page scroll and arrow movement

- Right Joystick controls mouse movement

- Right Thumb buttons 1,2,3 & 4 are pushed and held to activate the corresponding keys listed in the Key Guide
  Note: The most used keys are always active unless buttons 1,2,3 or 4 are held down

- The Left Joystick is used for all text and most numeric/punctuation input.

- It operates like the NW to SE directions on a compass with straight up=North

- Left and Right Shoulder Buttons provide basic function keys

- The Left Mouse, Right Mouse, Shift, Alt, Ctrl are "sticky" keys that are pushed to activate and pushed to deactivate
